Self-assessment questionnaire

Restrictive practice thematic
programme

Older People's Services

Safer Better Care

Introduction

This self-assessment questionnaire has been developed by the Chief Inspector of Social Services within the Health Information and Quality Authority (HIQA) to aid service providers to prepare for the Chief Inspector's restrictive practice thematic programme.

It is organised according to the themes and standards in the *National Standards for Residential Services for Children and Adults with Disabilities* (2013). Service providers are advised to consult the guidance document for this thematic programme when completing this questionnaire.

Judgment Descriptors

The following table shows the judgment descriptors used to assess performance against each of the eight themes in the Standards. These are also the judgment descriptors that inspectors will use when they have carried out a restrictive practice thematic inspection.

Compliant	Substantially Compliant
Residents enjoyed a good quality of life where the culture, ethos and delivery of care were focused on reducing or eliminating the use of restrictive practices.	Residents received a good, safe service but their quality of life would be enhanced by improvements in the management and reduction of restrictive practices.

How to complete this form

This self-assessment questionnaire is an editable PDF document. This means you do not need to print it out to complete it. Simply select the options with your computer mouse and use your keyboard to enter text.

You will be asked a series of questions relevant to each of the eight themes in the National Standards. Questions will be a mix of 'Yes' or 'No' and 'free text' responses. Some responses are required fields. When you have answered the questions under each theme you will be asked to make a judgment on your performance against the Standards under that theme. **NOTE:** Fields marked red are mandatory

You will note that you have the option of selecting 'not compliant' under each of the eight themes. This option should be used where you are of the view that your service is not compliant with the standards. For the purposes of the inspection report, inspectors will only make reference to the two judgment descriptors above: 'compliant' or 'substantially compliant'.
