

23rd April 2020

Dear Colleague

I am writing to inform you of a COVID support group that has been set up to support colleagues working in residential care across the public and private sector during this difficult period. It consists of a database of over 250 and a WhatsApp group of 183 Directors of Nursing, Persons in Charge, Owners, Practice Development Coordinators, Academics, Researchers, and Health & Social Care Professionals. I send updates to the group daily via email and ask questions submitted by the group, on behalf of the group. The WhatsApp group support each other by sharing concerns and sharing learning. There is also a mindfulness support group that is available for this group

If this is something you would like to participate in then please email me [REDACTED] with your name and phone number (WhatsApp downloaded)

Yours sincerely

[REDACTED]
