

Evidence gap identifier	EBAR 4
Brief title	Standardised costing for antimicrobial resistance in acute public hospitals in Ireland
Report	<u>Economic Burden of Antimicrobial Resistance (AMR)</u>
Date identified	09/11/2020
Identified by	CICER
Supported by	Rapid review
Population	N/A
Intervention	Interest: development of standardised costing models
Comparator	N/A
Outcome(s)	Standardised costing models
Setting	Acute public hospitals in Ireland
Study design	Economic model development
Further information	There is absence of standardised models for costing antimicrobial resistant pathogens in public acute hospitals in Ireland. Development of agreed cost models in Ireland based on evidence synthesis, surveys, data analysis, and expert consensus are needed.
